ANTWERP DESIGN WEEK

who are
WE

For over 30 years, Mobitec has been shaping spaces where life, conversation, and work flow naturally. As a Belgian family business, we specialize in manufacturing high-quality chairs and tables that combine design and comfort.

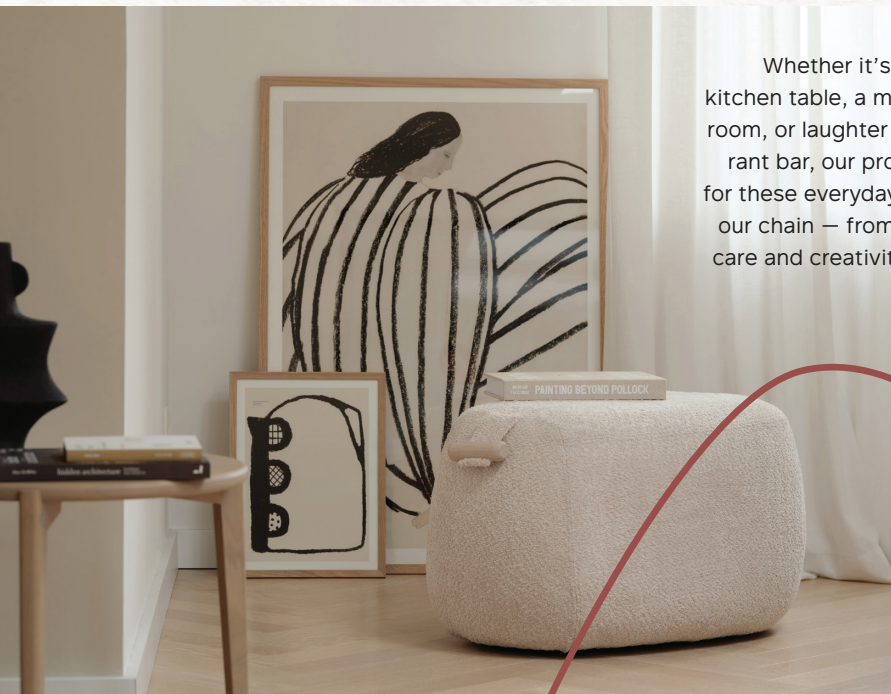

What sets us apart? Our ability to provide ultra-customizable solutions tailored to your specific needs. With more than 600 employees and three production sites in Poland, we produce around 200,000 chairs and 15,000 tables annually for the European market.

Our mission is simple: “We create moments of well-being” — a philosophy reflected not only in our products but also in our commitment to our teams, partners, and suppliers.

Whether it's a quiet family breakfast around the kitchen table, a moment of shared ideas in a meeting room, or laughter echoing among friends at a restaurant bar, our products are designed to be the spark for these everyday moments of great joy. Every link in our chain — from design to production — works with care and creativity to elevate these unique moments of life.

mobitec.be

*At the heart of our DNA
is a deep appreciation for
both art and craftsmanship.*

*That's why, whenever
possible, we enrich our
identity, our products,
and our scenographies
through collaborations
with exceptional artists
who share our values and
aesthetic vision.*

Ini Céramique

For this stand, we're fortunate to collaborate with INI Céramique, whose creations bring a poetic, organic touch to each of our designed spaces.

INI Céramique has created stunning ceramic vases that grace our tables, counters, and bar areas. These handcrafted pieces add refined texture and unique character to our furniture.

Sustainable furniture

RESPONSIBLE VISION

*Our commitment?
To create high-quality
furniture that is customiz-
able and built to last.*

Through eco-design and circular economy principles, we reduce our environmental footprint while promoting well-being for all. Sustainability is at the core of our approach and one of our driving forces, constantly pushing us to improve.

Discover some of our concrete actions:

- **54%** of our plastic packaging is made from **recycled materials**

4

- **1,000 MWh** of installed **photovoltaic** infrastructure = **30%** of our electricity comes **from renewable sources**

- **21% of our chairs** are assembled using **solvent-free glues**

- **35% reduction in volatile organic compounds (VOCs)** in our table varnishing process

- **New Ciclo-Cotton fabric** collection: **70% recycled materials**

- **Lotus chair: 50% CO² reduction** in transport emissions thanks to new packaging

the concept
OF THE STAND

the
art
of
well-being

In a world of noise, we offer a pause. Mobitec and Nobody&Friends invite you to step into a space where furniture doesn't just furnish — it feels. Where art isn't reserved for white walls — it lives among us.

The Art of Well-Being is more than an exhibition. It's a curated experience for all senses, where tactile comfort meets visual poetry. Affordable art by emerging talents finds a new voice alongside sustainable, emotionally intelligent furniture. Together, they speak one language: calm, human, real.

This collaboration redefines luxury as presence, creativity as care, and design as a pathway to inner balance.

Let's make well-being a design statement.
