MONOCOAT

WE OPEN
A NEW CHAPTER
IN *natural oiled*
WOOD FINISHING

More natural.
More sustainable.
More us.

Oil Plus 2C

Every piece of wood has a story. It grows, it breathes, it changes. At Mobitec, we believe that honouring wood means celebrating its nature – not covering it.

That's why we've chosen the Rubio Monocoat Oil Plus 2C for our furniture.

This innovative solution prevents overlaps and marks, ensures minimal product consumption, and provides long-lasting protection – all while preserving the wood's authentic look and natural fibre structure. Perfectly suited for both residential and professional spaces.

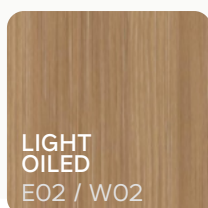

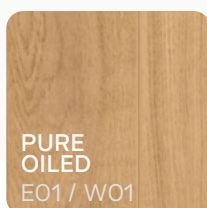

It's our way of bringing together craftsmanship, sustainable innovation and ease of care – to create furniture that inspires genuine moments of well-being.

9 COLOURS THAT KEEP WOOD *real*

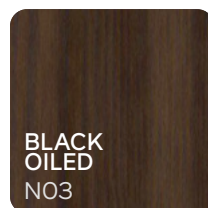

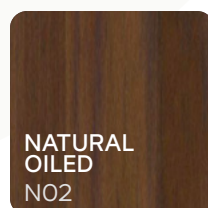

Within the Mobitec collection, the oil is available in a palette of **nine different colours for oak, beech and walnut** – from light, natural tones to deep, warm shades.

Each hue highlights the unique character of the wood, allowing its grain and texture to shine through beautifully.

OAK / RUSTICAL OAK

WALNUT

BEECH

*These colours replace
the previous oil finishes
P01 and N01.*

SUSTAINABILITY AS A CORE VALUE

At Mobitec, sustainability is more than a principle — it's part of our vision.

By choosing **Rubio Monocoat Oil Plus 2C**, we reaffirm our commitment to crafting furniture that respects both nature and the people who live with it. **Made from natural ingredients and free from harmful emissions**, this oil embodies our core values: authenticity, durability, and genuine care for the environment.

But sustainability at Rubio Monocoat goes far beyond the formula itself.

The oils are based on linseed, a renewable resource that grows quickly and abundantly, and every stage of production reflects the same environmental care — from responsible sourcing and energy efficiency to waste reduction and recyclable packaging.

THE *advantages* OF OUR NEW OILS AT A GLANCE

— ONE SINGLE LAYER — LESS IS MORE

Oil Plus 2C only needs a single layer to do its work. **The oil bonds with the wood fibres**, rather than forming a film on top — preserving the natural look, feel, and depth of the grain. Quick drying.

The result: a soft, matte finish.

— SAFE & ECOCONSCIOUS — 0 % VOC

Made from natural ingredients and certified 0% VOC, Oil Plus 2C is completely **safe for both people and the planet**. It supports a healthy indoor climate and meets the highest international standards for air quality and sustainability — including GREENGUARD Gold, Eurofins Indoor Air Comfort Gold, and the A+ Label for low emissions.

Certified food-safe, it's perfectly suited for dining tables and living spaces where everyday life unfolds naturally.

— RESISTANT & EASY TO MAINTAIN

The oil creates a surface that resists scratches, wear, water, and heat. Minor marks or stains can be repaired locally, while larger areas can easily be refreshed with light sanding and re-oiling — no professional help needed.

Rubio Monocoat offers simple, effective care products that renew protection and keep the wood's natural beauty alive.

GOOD TO KNOW ABOUT THE DRYING TIME AND INITIAL USE

- Maximum protection is achieved after **5 to 7 days**. During this final curing phase, please be especially careful with water and other liquids.
- For safe transport, tables are **packaged after 24 hours of drying**. Once unpacked and exposed to air, the oil continues its final curing process.

Caring FOR YOUR OILED WOODEN FURNITURE

A Mobitec table is made to be lived with — to share meals, laughter, and everyday moments. Thanks to its new finish, it retains its natural beauty for years to come — with only minimal care. Each table treated with **Rubio Monocoat Oil Plus 2C** comes optionally with a **care set**. It contains all the essentials to clean, refresh, and protect your wood naturally — for a lifetime of use.

— All Natural Wood Cleaner (125ml)

A safe, gentle and highly effective cleaner for all wooden surfaces. Thanks to its natural micro-organisms, the product is self-cleaning and continues to work long after use. Your surfaces stay cleaner for longer, and future cleaning becomes easier.

— Refresh Eco Spray (125ml)

Over time, wooden surfaces can look dry or dull. Refresh Eco restores their natural radiance: it nourishes the wood, refreshes the look and keeps the surface pleasant to the touch. Depending on usage, you can apply it several times a year on specific areas.

— Oil Plus 2C one component (in your table's colour)

For small marks, tiny damages or light colour corrections, use Oil Plus 2C in the original colour. It blends seamlessly and restores the surface in a subtle, natural way.

USEFUL *tips*

- Prefer dry cleaning whenever possible – frequent cleaning with water may wear off the protection over time.
- Do not use dish liquid, soaps or aggressive cleaners/chemicals.
- Keep indoor humidity between **45% and 60%** for optimal wood stability (a hygrometer can help).
- Remove water, liquids or dirt promptly to avoid marks.
- Very intensive use or insufficient care may require more extensive maintenance by a professional.
- **If sanding is needed, use 120-grit sandpaper** to ensure the colour and finish remain consistent.
